

Check out what else is going on with CREST this Spring

Santa Monica Sports Experience

A unique camp for children ages 8-14 who enjoy sports, action-packed tournaments, and organized games. Our goal is to inspire a love for sports and fair play in youth at all levels of athletic ability. Whether it's learning a new skill or participating in a specialized class, your child will look forward to a new and exciting challenge every day!

Week 1: April 3-7, 2017

Week 2: April 10-14, 2017

\$200.00 for SM residents per week

8:30AM-5:00PM (extended care available for an additional fee)

Camp Santa Monica

Enthusiastic and experienced staff will lead campers in mind stretching science, innovative art projects, organized outdoor challenges, and interactive local trips. Participants will explore local attractions and uncover how fun learning can be in the outdoors! For ages 8-14.

Week 1: April 3-7, 2017

Week 2: April 10-14, 2017

\$200.00 for SM residents per week

8:30AM-5:00PM (extended care available for an additional fee)

*Material fees are due by the end of the second class, and should be paid directly to the contractor. Material fees are separate from the registration fee, and financial assistance does not apply to them. Material fees not received by the end of the second class meeting will result in the participant being automatically dropped from the class.

Academic Chess: Checkmate! Come and join us in this fun and educational class, designed for all ages and levels of chess expertise. Every child will receive a different lesson each week according to their skill level, as well as the opportunity to practice their game with other students. On the last day of the session, a mini-tournament will take place.

Black Belt Kids: This program is designed to target age-specific skills for children in elementary school grades. The curriculum introduces core skills training to elementary age students while reinforcing their physical, intellectual, social, and emotional abilities. More emphasis is placed on building their core fundamental skills with a strategic balance of martial arts. During each class, students will earn skill stripes signifying their progress and qualifying them for their next rank.

Civil Engineering: Try your hand at creating, testing, and refining a balsa wood bridge designed to withstand incredible forces! Examine various bridge designs and discover how the forces of tension, compression, bending, torsion and shear are distributed throughout their structures. Build up your skills and creativity with Engineering For Kids!

Guitar: Discover your musical aptitude in this fun introduction to guitar with a talented Santa Monica Conservatory faculty teacher. Learn new songs each week and perform an end of the session concert. The registration fee includes use of the instrument during class time.

Jr. Civil Engineering: Building a house to withstand the Big Bad Wolf is where the fun begins in this class. Explore concepts of building and construction through hands-on exploration and design. Discover the engineering behind sky scrapers, bridges, roads, and more in this fun and engaging experience for your youngest engineers in training.

Mad Science: We are on a mission to explore the world of Science! Build your own Technicolor Blender while learning about the hidden components of light. Use hands on experimentation to find out if compasses really help you find your way. Have fun with thermometers and investigate amazing optical illusions. Explore how sounds are created and transmitted and create hair-raising experiments with plasma balls. Cultivate a healthy attitude about fitness and nutrition in a fun way while discovering the biology of your taste buds!

Music 'N Motion: Come dance with us as we explore everything from Jazz to Pop to Ballet to Broadway, all in one exciting and energetic class! We welcome silliness and imagination as children use their entire bodies to stay active, find comfort in their own skin, and grow up strong. On the final day of class, parents are invited to attend a special performance complete with simple costumes, make-up and photos, all provided by MNM!

Musical Theatre: A fun, non-competitive production class in which each child is given an opportunity to sing, dance, and act in a short presentation of "Peter Pan". Children will strengthen their abilities to perform and collaborate, as well as enhance their skills of interpersonal awareness, and build self-confidence.

Play Tennis: TGA brings the tennis court to your school, offering a fun introduction to the game. Students focus on improving fine motor skills and coordination through games and drills while learning the basic rules & etiquette of tennis. Coaches use teachable moments during lessons and games to promote life skills like perseverance and sportsmanship. Modified equipment and activities are designed to help each student reach a new level of success in an entertaining and supportive environment.

Spanish: Join our Spanish Club and expose your child to Spanish from an early age. Our focus and teaching methodology is based on "learning through doing." Children pick up the language naturally through songs, play, story-telling and activities rather than just memorizing random vocabulary. Classes are very hands on and dynamic where children are exposed to the language in a natural way and acquire the language organically.

Spy Kids: Jr. Detectives: Put on your official Spy Kids badge and learn how to investigate a crime scene, decode secret messages, and search for clues. Explore the fascinating world of solving mysteries while developing observations and reasoning skills, as you become a "Junior Detective!"
